Happy Valley
Veterinary Clinic & Pet Hotel

COMPANY HISTORY

1979
47 YEARS

Dr. Lambros Lambrou opened his first Veterinary Clinic in Petrou kai Pavlou area in 1979. Then Happy Valley Veterinary Clinic & Pet Hotel Ltd. in Erimi was founded in 1990. He eventually replaced his clinic at Petrou kai Pavlou, relocating to Erimi in 2006.

We provide a Veterinary Clinic, a Pet Hotel, Grooming Salon, and Pet Shop. The premises sits on two hectares of land, surrounded by palm trees, fountains, and landscaped gardens.

How to transition a pet to new food

Ideal body condition score number 4

Waist - the waist has a curve, the waist is not straight

Abdomen – tucked up, not dropping down

Ribs – minimal fat covering the ribs and easily palpable

BODY CONDITION SCORE SMALL DOG

TOO THIN

1

- Ribs, lumbar vertebrae, pelvic bones and all bony prominences evident from a distance
- No discernible body fat
- Obvious loss of muscle mass

2

- Ribs, lumbar vertebrae, and pelvic bones easily visible
- No palpable fat
- Some bony prominences visible from a distance
- Minimal loss of muscle mass

3

- Ribs easily palpable and may be visible with no palpable fat
- Tops of lumbar vertebrae visible, pelvic bones becoming prominent
- Obvious waist and abdominal tuck

IDEAL

ABOVE IDEAL

4

- Ribs easily palpable with minimal fat covering
- Waist easily noted when viewed from above
- Abdominal tuck evident

5

- Ribs palpable without excess fat covering
- Waist observed behind ribs when viewed from above
- Abdomen tucked up when viewed from side

6

- Ribs palpable with slight excess of fat covering
- Waist is discernible when viewed from above but is not prominent
- Abdominal tuck apparent

OVERWEIGHT

OBESE

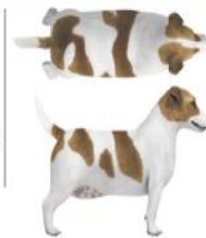

7

- Ribs palpable with difficulty, heavy fat cover
- Noticeable fat deposits over lumbar area and base of tail
- Waist absent or barely visible
- Abdominal tuck may be absent

8

- Ribs not palpable under very heavy fat cover or palpable only with significant pressure
- Heavy fat deposits over lumbar area and base of tail
- Waist absent
- No abdominal tuck
- Obvious abdominal distension may be present

9

- Massive fat deposits over thorax, spine, and base of tail
- Waist and abdominal tuck absent
- Fat deposits on neck and limbs
- Obvious abdominal distension

Ideal body condition score number 4

Waist - the waist has a curve, the waist is not straight

Abdomen – tucked up, not dropping down

Ribs – minimal fat covering the ribs and easily palpable

BODY CONDITION SCORE CAT

TOO THIN

- 1**
- Ribs, spine and pelvic bones easily visible on shorthaired cats
 - Very narrow waist
 - Small amount of muscle
 - No palpable fat on the rib cage
 - Severe abdominal tuck

- 2**
- Ribs easily visible on shorthaired cats
 - Very narrow waist
 - Loss of muscle mass
 - No palpable fat on the rib cage
 - Very pronounced abdominal tuck

- 3**
- Ribs visible on shorthaired cats
 - Obvious waist
 - Very small amount of abdominal fat
 - Marked abdominal tuck

IDEAL

ABOVE IDEAL

- 4**
- Ribs not visible but are easily palpable
 - Obvious waist
 - Minimal amount of abdominal fat

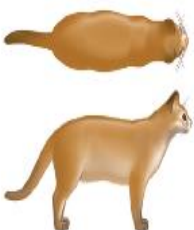

- 5**
- Well proportioned
 - Ribs not visible but are easily palpable
 - Obvious waist
 - Small amount of abdominal fat
 - Slight abdominal tuck

- 6**
- Ribs not visible but palpable
 - Waist not clearly defined when seen from above
 - Very slight abdominal tuck

OVERWEIGHT

OBESE

- 7**
- Ribs difficult to palpate under the fat
 - Waist barely visible
 - No abdominal tuck
 - Rounding of abdomen with moderate abdominal pad

- 8**
- Ribs not palpable under the fat
 - Waist not visible
 - Slight abdominal distension

- 9**
- Ribs not palpable under a thick layer of fat
 - Waist absent
 - Obvious abdominal distension
 - Extensive abdominal fat deposits
